EXPERIENCE

PAMM Env. Solutions, Pune — Intern

December 2022-present

- Internship for the Full stack developer where worked on both frontend as well as backend.
- Work on the backend using PHP and MySQL.
- Make the frontend designs for the company.

Vodafone Idea LTD, Virtual — Intern

August 2022 - October 2022

- Created the doctor Robot using the IOT devices which will be monitored by the doctor from anywhere and which will helps the doctor to take care in emergency situations.
- Learn about the Node MCU and various hardware devices.

PROJECTS

MyBook | MERN stack

- It's a MERN stack project which is used to write and keep the daily notes working as a daily dairy.
- It has proper authentication and security measures like login and signup.

Newshub | React JS , RAPIDAPI

- It is an application created using ReactJS and newAPI.
- It provides the daily news updates to the user.
- In this we have made the use of the already existing API from NewsAPI.

Text Editor | React JS

- It is an application created using ReactJS and newAPI. It provides the daily news updates to the user.
- In this we have made the use of the already existing API from NewsAPI.
- Link: <https://vishalwaghmode.github.io/Textutils/>

Robodoc | IOT

- Robodoc is an iot based robot which is capable of making the communication of the doctor with patient in emergency situation using video call.
- It is helpful for doctor to do the daily routine check from outside the hospital also.
- It works on the WI-FI for now but we are trying to make it on internet.
